

E-series printer is developed based on TIJ2.5 tech, with high resolution and good stability. It can control 1-2 print heads, support to print text, batch number, manufacture date& expiry date, counter, image, variable barcode and database.

- With a 7inch touch screen as controller, can edit directly, easy to use.
- Maximum support 2 print heads, can combine or separate freely according to print requires
- High system integration, small in size, less component, easy install and maintenance
- Metal shell, industrial design, which makes printer more stable
- Non-contact RFID lock system, which makes it more stable to read the cartridge.
- It supports to print database with text and barcode.
- With competitive cost in the package market.

Product details

Parameters:

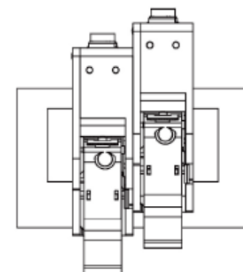

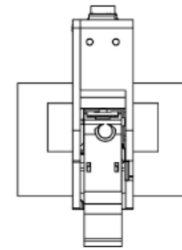

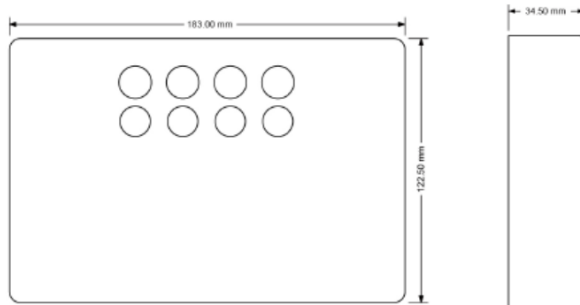

Model	EAJET
Print Tech	HP TIJ2.5
Print height	Max 12.7mm
Head quantity supported	Max 2 heads
Print Resolution	150-600 DPI
Print speed	40m/min
Ink type	Water /Solvent based
Ink system	Can use together with Loogal UISS ink system
Interface	Warning light/USB
Sensor	Simulation sensor/External sensor
Encoder	Simulation speed/External encoder

Apply industries:

1. Food & Beverage package, Chemical package, Pharmaceuticals, Building material, steel structure,
2. Carton sealing machine
3. Various kinds of package machine.

Advantage of Dikai Thermal Inkjet

- ※ Easy operation, no need of any training.
- ※ Full metal shell, industrial design and stronger.
- ※ Take HP original driving board to make print effect higher quality.
- ※ Wireless print head verify tech, more stable and intelligent.
